

# MEERCAT WORKBOATS

## Another Meercat Workboat goes to a happy customer

The Meercat team have just waved goodbye to our latest 15m workboat 'TopLoader' to the Topbond PLC group. The vessel was completed to schedule with the new owners arriving to take over and sail her to London where she is due to start work on a project straight away.

Her initial sailing was to the port of Dover where feedback was good and she was running like a dream, as to be expected.

**TOPBOND PLC**

*The topLoader crew ready to take their new Meercat away*

*TopLoader sails past a Williams Shipping Meercat heading down Southampton water whilst transiting to Dover*

Glenn Springett from Topbond said "we had a requirement for another workboat and already being owners of a Meercat the choice to purchase another one was simple, the new vessel fitted our requirements and will be put to work straight away.

The boats are worked hard and are in continuous use due to a high demand of work we have for them, so choosing a vessel that is strong, reliable and will go the distance was important and therefore another Meercat was a no brainer"

**Did you know:** A Meercat Workboat can be built within 14 weeks from laying the keel down to being launched and certified fit for sea
