Environmental Policy Statement

Topbond operates an ISO 14001 –Certified system to manage all of its activities so as to give benefit to society, ensuring that they meet relevant laws and regulations, are acceptable to the community at large and that their environmental impact is reduced to a practicable minimum. To this end they will ensure that environmental considerations are taken into account at every stage of their operations from planning through to execution, so as to minimise environmental impact, prevent pollution and ensure effective use of resources. Our company also complies to the National Highway Sector Scheme 18 for Vegetation removal, drainage and structures contract requirements.

Topbond PLC will:

- Encourage and promote best practice and sustain continuous improvement in environmental performance.
- Ensure compliance with environmental legislation.
- Assess the environmental effects of their activities and take all practicable steps to protect the environment.
- Provide information and assistance to ensure that materials are procured, used, stored and disposed of in an environmentally responsible manner.
- Promote the open exchange of environmental information with clients and suppliers.
- Set and monitor environmental objectives.
- Provide appropriate environmental training where necessary to ensure that all staff are aware of the environmental effects of their actions.
- Comply with the spirit and requirements of Network Rail's environmental policy.
- Ensure the use of correct off-site disposal facilities.
- Ensure that resources are used wisely.
